DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, drawn to an apparatus, classified in class 251, subclass 315.16.
 - II. Claims 7-12, drawn to a method of making, classified in class 29, subclass 890.128.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus can be made by drilling after the opening has been formed or by moving the ball and keeping a nozzle stationary during water jetting.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Charles Chandler on September 1, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3751

Priority

5. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Italy on January 14, 2003. It is noted, however, that applicant has not filed a certified copy of the 2003U00000 application as required by 35 U.S.C. 119(b).
